FedEx Integration Assistant | Preparing for a Successful Integration

Welcome | **Begin** | Import | Export | Finish | Help

Introduction | **Before You Begin**

Preparing for a Successful Integration

The key to a successful integration is a thorough understanding of what information is stored, how it is stored in your existing application, and how your shipping process works.

Before you continue, ensure that you have read the [FedEx Integration Assistant Tutorial](#), and that you can answer the following general questions:

Which applications contain the shipping information that you want to integrate?

Who in your organization has a high-level of technical knowledge about the applications that store your shipping information?

What is the flow of information, from receipt of the customer's order to the printing of the shipping label?

How does the shipping department process a package? Do shipping processes vary by customer, package, etc?

Common Questions

- [What do I need to know about my applications?](#)
- [What do I need to know about the flow of information?](#)
- [What do I need to know about my shipping process?](#)
- [Who in my organization can assist me?](#)
- [Tutorial](#)

How will you create shipping labels for your packages?

Answer each question that appears below. FedEx Integration Assistant will select the best shipping method based on your answers. If your answers vary by situation, answer the questions appropriate for the first situation, complete the profile, and then run FedEx Integration Assistant again to create a profile for each additional situation.

Do you print labels one at a time? Yes No

Do you use a unique name or code to look up each package? Yes No

Do you need to edit shipping information before printing the label? Yes No

FedEx Integration Assistant | Congratulations, your integration profile is complete.

Welcome Begin Import Export Finish Help

Summary Instructions

Congratulations, your integration profile is complete.

The following is a brief overview of how to use your new integration profile.

Import > Single-Edit

Using a Reference lookup

1. From the *Integration* menu in FedEx Ship Manager, select the Single-Edit profile with reference look up capability.
2. The Customer Reference Lookup dialog box appears.
3. (Optional) Place the package on the scale.
4. Enter the reference information for the package that you want to ship. Customer Reference look up values may not exceed 39 characters.
5. Click OK. Information about the package is sent to the screen.
6. If the package is found, but has errors, an error dialog box appears. Click OK to manually correct the package errors.
 - a. If no record is found for the package, an error prompt appears.
7. (Optional) To skip the package, click *Clear fields*.
8. Click *Ship*.
9. If the shipment is successful, the reference dialog disappears and the label prints.
10. A notification appears if the package has an error.
